State of the Rockies Conference Workshop:

Promoting Renewable Energy in Colorado Springs

Monday, April 7th

4:30-6:30

Slocum Commons, Slocum Hall

Colorado College Campus

With growing concern over climate change and rising prices of oil and natural gas, attention is turning more and more to renewable energy. What opportunities exist to incorporate renewable energy in our everyday lives? The goal of this State of the Rockies Workshop is to foster dialogue about the role of renewable energy in our communities, ways in which the community can promote energy conservation programs, and explore incentives and techniques for including renewable energy in our homes and businesses. We invite all members from the Colorado Springs community to attend and participate!

Attendees include representatives from Colorado Springs Utilites, SolSource Inc., and Colorado Springs citizens who have utilized solar energy in their homes and businesses.

Food will be provided

The Colorado College State of the Rockies Project is a student-faculty collaborative research initiative that examines issues pertinent to the eight-state Rocky Mountain West. This workshop is an extension of the research conducted by Liz Kolbe, class of '08. Her report can be found in the 2008 State of the Rockies Report Card.
