Vehicle-to-Vehicle Accidents

The following information compiled from Colorado Springs Police Department records, documents accidents between 2000 and 2012 at intersections and crosswalks on and adjacent to Colorado College.

Intersection	Rear End	Left-Turn	Right-Angle	Other	Total
Cascade / Uintah	41	31	30	44	146
Cascade / Cache La Poudre	13	3	4	7	27
Tejon / Cache La Poudre	1	2	3	7	13
Nevada / Cache La Poudre	9	15	19	18	61
Nevada / Uintah	33	25	41	43	142
Cascade Non-Intersection (between Uintah and Cache La Poudre)	52	0	0	19	71
Nevada Mid-Block (between Uintah and Cache La Poudre)	56	1	3	44	104

Definitions:

Rear End Accidents – One vehicle running into the back end of another vehicle./

Left-Turn Accidents – A vehicle turning left and failing to yield to on coming traffic. These accidents involve vehicles traveling on the same street.

Right Angle Accidents – This is a situation where one vehicle moving through the intersection while the light is red collides with another vehicle. These accidents involve two vehicles colliding while traveling on different streets.

Other – These types of accidents include the following types:

- Lane changing accidents
- Hitting objects such as poles, curbs, trees, parked cars or animals
- Head-on and U-turn accidents
- Accidents recorded but lacking sufficient information to discern the type of accident
