

Edge INTERNSHIP PROGRAM

As an intern with Blue Shield of California, I will join an environment committed to equity as we strive to ensure that all Californians have healthcare that is both high-quality and affordable.

I'm most excited about having the opportunity to share my skillset with an organization that does impactful work while also professionally developing myself at the same time.

Cameron Mongoven '21

Rising Junior

Major: Sociology

Minors: Urban Studies & Education

**Blue Shield of California
San Francisco, CA**

Talent Pipeline Intern

Edge Internship Program

Class of Summer 2019

Cameron is proud to call Austin, Texas his hometown. His life is driven by his desire to share his compassion with those around him. He currently serves as one of the student body Vice Presidents and chairs the Inclusion Committee, where he plays an active role in reshaping campus culture and practices. He has also had the pleasure of being a mentor for the Bridge Scholars Program, where he introduces new students to life at Colorado College. However, he believes that he has learned far more from them throughout mentoring than he has been able to teach them. Additionally, he interns at Family Promise of Colorado Springs and helps provide shelter to homeless families in the area. His passion of helping others—no matter the capacity—has developed his commitment to making change in the world he lives in. In his free time, he enjoys long-distance running, watching reality TV with his family, and talking about Texas.
