

Edge INTERNSHIP PROGRAM

Jio Chang '20

Rising Senior

Major: Molecular Biology

**Blue Shield of California
San Francisco, CA**

Talent Pipeline Intern

Edge Internship Program

Class of Summer 2019

As an intern with Blue Shield of California, I will help deliver the Blue Shield mission to ensure all Californians have access to high-quality health care at an affordable price.

I'm most excited to have a mentor at Blue Shield to teach me the business of healthcare.

Jio grew up in Moraga, California and graduated with honors from Campolindo High School. She is a student-athlete at Colorado College, balancing a molecular biology course load and the Division III varsity swim team. She was voted Rookie of the Year and Most Valuable Team Member for the 2017 and 2019 seasons respectively. She will also be a senior captain for the 2020 season. She works as a Career Center Peer Intern and also is a co-chair of the Korean-American Student Association (KASA), planning campus-wide events such as KASA Formal and Asian Culture Night. Jio has worked as a summer swim coach and in a bioengineering lab at UC Berkeley.

After graduation, she plans to work in the business of healthcare and medicine. She loves to read in her hammock and puzzle with her friends.
