*This data is as of 06/30/2021 and is based on 640 participants who are actively contributing to the plan. This report uses actual salary and/or compensation data Colorado College has provided to TIAA.*
**Tier 1: Target Date Funds**

- Series of funds with each fund having a target retirement date that corresponds to when an investor is assumed to reach age 65
- Each fund is a single portfolio consisting of multiple asset classes to create a globally diversified portfolio
- Funds have an equity glide path that reduces the equity exposure (and in some cases exposure to other volatile assets) as the portfolio nears the target retirement date
- Most common Qualified Default Investment Alternatives (QDIA) choice because of the simplicity of communication and the availability of Date of Birth (DOB) for plan sponsors and record keeping vendors

**Tier 2: Core Index Array**

- Attractive to plan sponsors and participants because:
  - Increased focus on fee reasonableness
  - Simplicity of portfolio construction decision making
  - Index funds are already prevalent to some degree in most defined contribution investment menus (A frequent example is an S&P 500 Index fund)
  - Competitive investment management environment is driving index-fund fees lower

The self-directed brokerage allows employees to allocate retirement savings contributions into a variety of investment choices beyond the core investments. Employees can choose to invest in more than eight hundred no-transaction-fee mutual funds and thousands of transaction-fee funds that are available on the brokerage platform.

Other fees and expenses do apply to a continued investment in the fund and are described in the fund’s current prospectus. Retirement plan contributions cannot be automatically directed to your brokerage account. Please keep in mind, mutual fund returns are not guaranteed, and employees assume all risks associated with investing in them.
