

Meeting Agenda

Meeting: Library Partners

Date: October 13th, 2022

New Business:

1. Intentional partnerships (Dustin)
 - a. Dustin and Emily have created an Ad Hoc Committee that will meet and discuss OER stuff.
2. Future of the viz wall (Chad)
 - a. When the viz wall was installed, the College initially paid \$100,00+ but the wall is currently broken. To fix the wall we will be looking at a very costly fix. Should the wall be fixed or removed due to the cost? Do we know if the wall is a “named” space? If so, this would require input from advancement to see what the deed of the gift is.
 - b. We would also need a real price from Tulio’s team for a cost. The College initially hired a contractor to install the data viz wall, but the AV team is responsible for it, which makes it complicated. The AV team shouldn’t be responsible for the wall. We currently don’t have a contract or vendor for it as it is a specific specialty, but if we fix the wall, that should be something to investigate. **Action Item: Chad** will go back to the AV guys to get details on costs and what to do to get it fixed.
 - c. Jenn has had professors request to use the wall in the past. **Jenn** will reach out to advancement for details on the deed. She will also ask about the deed for the tech sandbox area.
 - d. If the decision is made to remove the wall, Dustin would like someone to paint a mural.
3. Collaborative workspace on the 1st floor in the “fidget spinner” area of the tech sandbox (Chad)
 - a. Chad proposed that we remove the fidget spinner tables and create a collaborative space similar to Peony’s idea for the Crown Center area in the admin suite. Desks that could connect to laptops and couches would be nice. Not sure if it should be an enclosed space.
 - b. It was mentioned that the Macs that are currently in that space are not working. If they are not ITS needs to know so they can get it fixed.
 - c. There was a proposed idea to increase ITS space to the next pillar and flip the help desk to the Tech sand box area. Also, should look at redoing the 1st floor east side area. The computers that are currently there are not seeing much use. Possibly move those against the wall and create kiosks stations for printing. This

would also help increase the walking area by adding the computers to just one wall. Chad will draw a mock-up and present later.

Old Business:

1. None

Any other Business:

1. Information Literacy projects
 - a. Aaron is working with Carlos on information literacy projects.
2. ITS workspace update
