In this document:

- An asterisk (*) in a response category means that less than 0.5% of respondents chose that response category and a dash (-) represents no response.
- An carrot (^) denotes rounding. Due to rounding, some figures may be higher or lower by less than one-half of one percent.
- "Skip base" is the percentage of voters that are asked a question because they meet a criteria based on a response to a previous question, meaning not all 400 respondents received that question.
- "Total base" is the percentage of the total sample, in this survey that is 400 voters.

- U1. As you may know, a proposal by five Native American tribes asking the federal government to increase protections for existing public lands in southeastern Utah known as the Bears Ears area was granted at the end of last year. This resulted in a new national monument in Utah with protections for natural areas and water similar to those in national parks. The public can go there to view wildlife, camp, fish, hike, hunt, or ride ATVs. It would not allow new mining or oil and gas development.
