36. Let me read you two points of view about the issue of oil and gas drilling on public lands like national forest land and please tell me which one comes closer to your own even if neither matches it exactly. **(ROTATE)**

<u>Total</u>	<u>AZ</u>	<u>CO</u>	<u>MT</u>	<u>NM</u>	<u>UT</u>	<u>WY</u>	
35%	35%	33%	36%	31%	43%	43%	Bureaucratic red tape, burdensome federal regulations, and government policies that block access to federal lands have stood in the way of the West reaching its full energy and jobs potential and our country gaining energy independence. Energy production on public lands has declined, while increasing by double digits on private lands. We need to allow more public lands to be opened to responsible energy development.
							OR
59%	59%	62%	56%	62%	51%	49%	More than 38 million acres of public lands - including land in six national parks - are currently leased by oil and gas companies, and oil production on public lands has been steadily climbing. Public lands that are drilled are often closed for other uses - like hunting or hiking - and the effects of contamination on the land can linger for generations. We need to ensure strong standards are in place and that drilling is not allowed in critical locations near recreation areas, water sources, and wildlife.
